Study Questions:

1. Describe the concept of decentralized governance in DAOs. How does this approach differ from traditional, centralized decision-making structures, and what are a decentralized governance model's potential benefits and drawbacks?

2. Compare and contrast Protocol DAOs and Investment DAOs. How do their goals and governance structures differ, and what are some examples of each type?

3. Considering the different types of DAOs (e.g. Investment DAOs, Protocol DAOs, Philanthropy DAOs, etc.), which use case do you find most compelling for blockchain governance? Which types of organizations do you believe derive the most value from a DAO structure vs. a traditional organizational form?
